

Common Emitter Amplifier

Inspection rendering of exported ASC with installed LTspice ASY geometry (not an application screenshot)

Phase 7 — Common Emitter Amplifier

common_emitter_amplifier.asc | 6 symbols / 36 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 13 pins | 6 groups | 36 wire segments | 2 nonconductive crossings

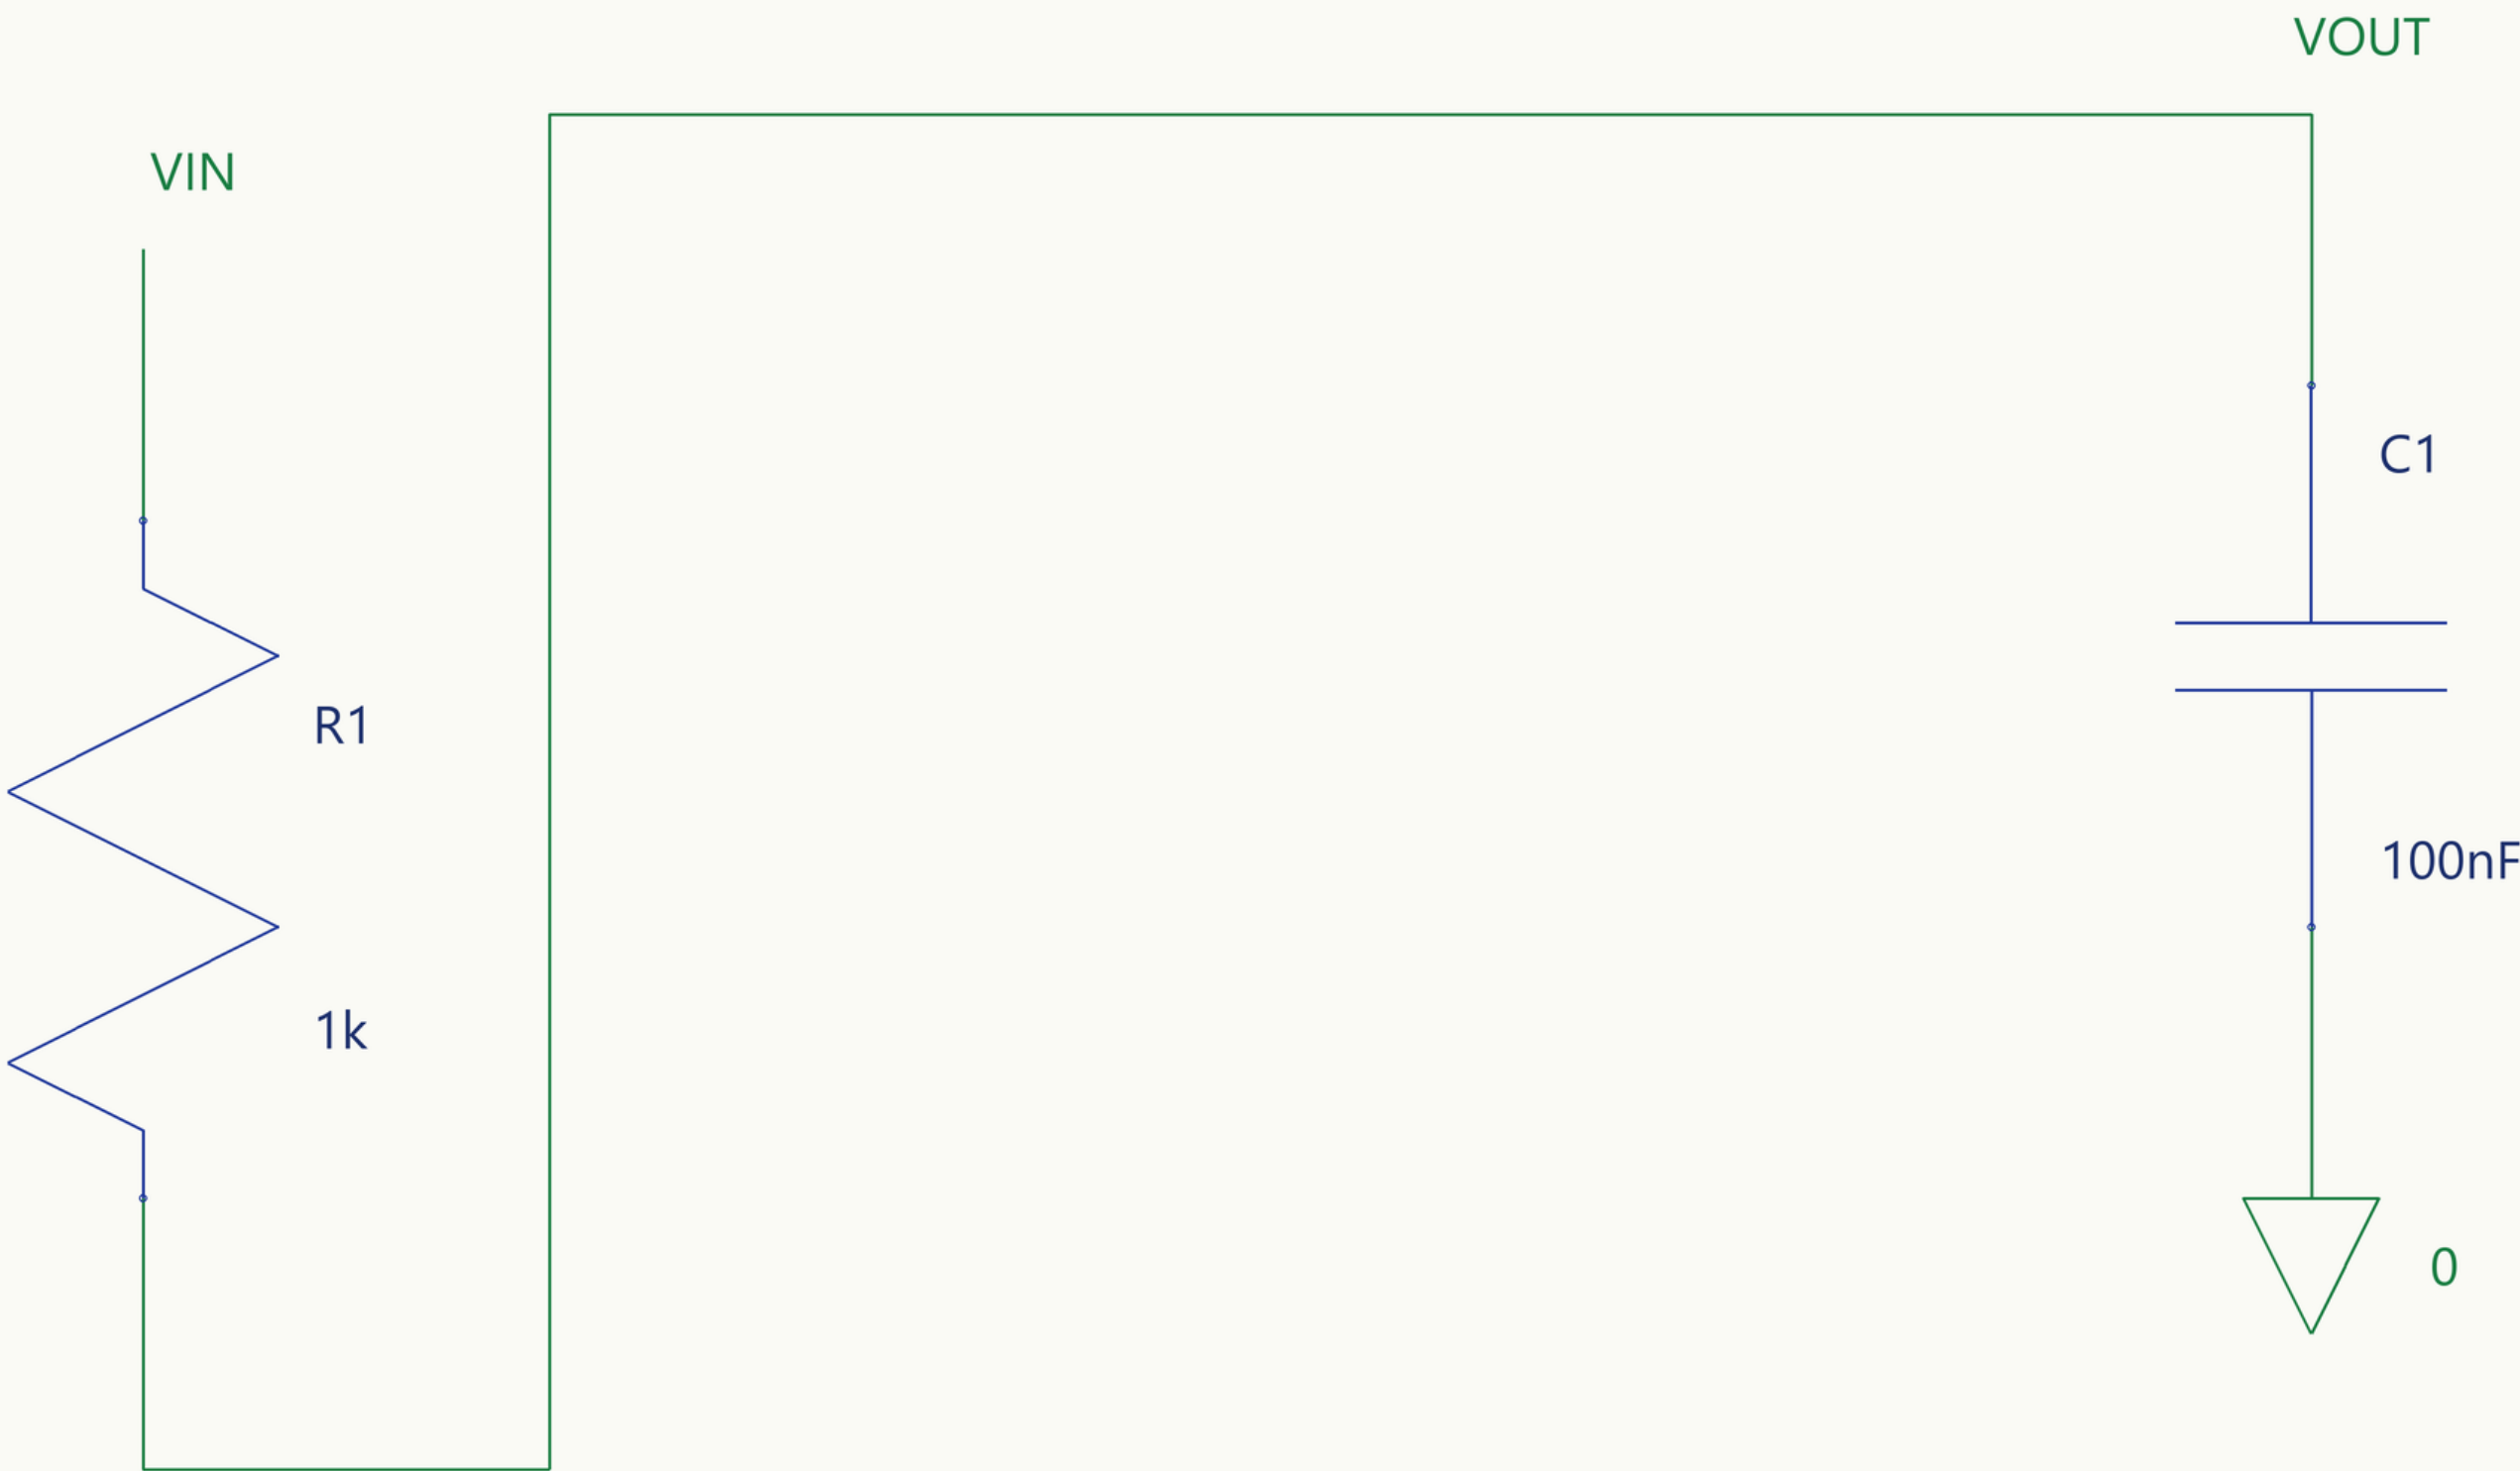

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

RC Low-pass Filter

Inspection rendering of exported ASC with installed LTspice ASV geometry (not an application screenshot)

Phase 7 — RC Low Pass Filter

rc_low_pass_filter.asc | 2 symbols / 7 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 4 pins | 3 groups | 7 wire segments | 0 nonconductive crossings

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

RC High-pass Filter

Inspection rendering of exported ASC with installed LTspice ASV geometry (not an application screenshot)

Phase 7 — RC High Pass Filter

rc_high_pass_filter.asc | 2 symbols / 7 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 4 pins | 3 groups | 7 wire segments | 0 nonconductive crossings

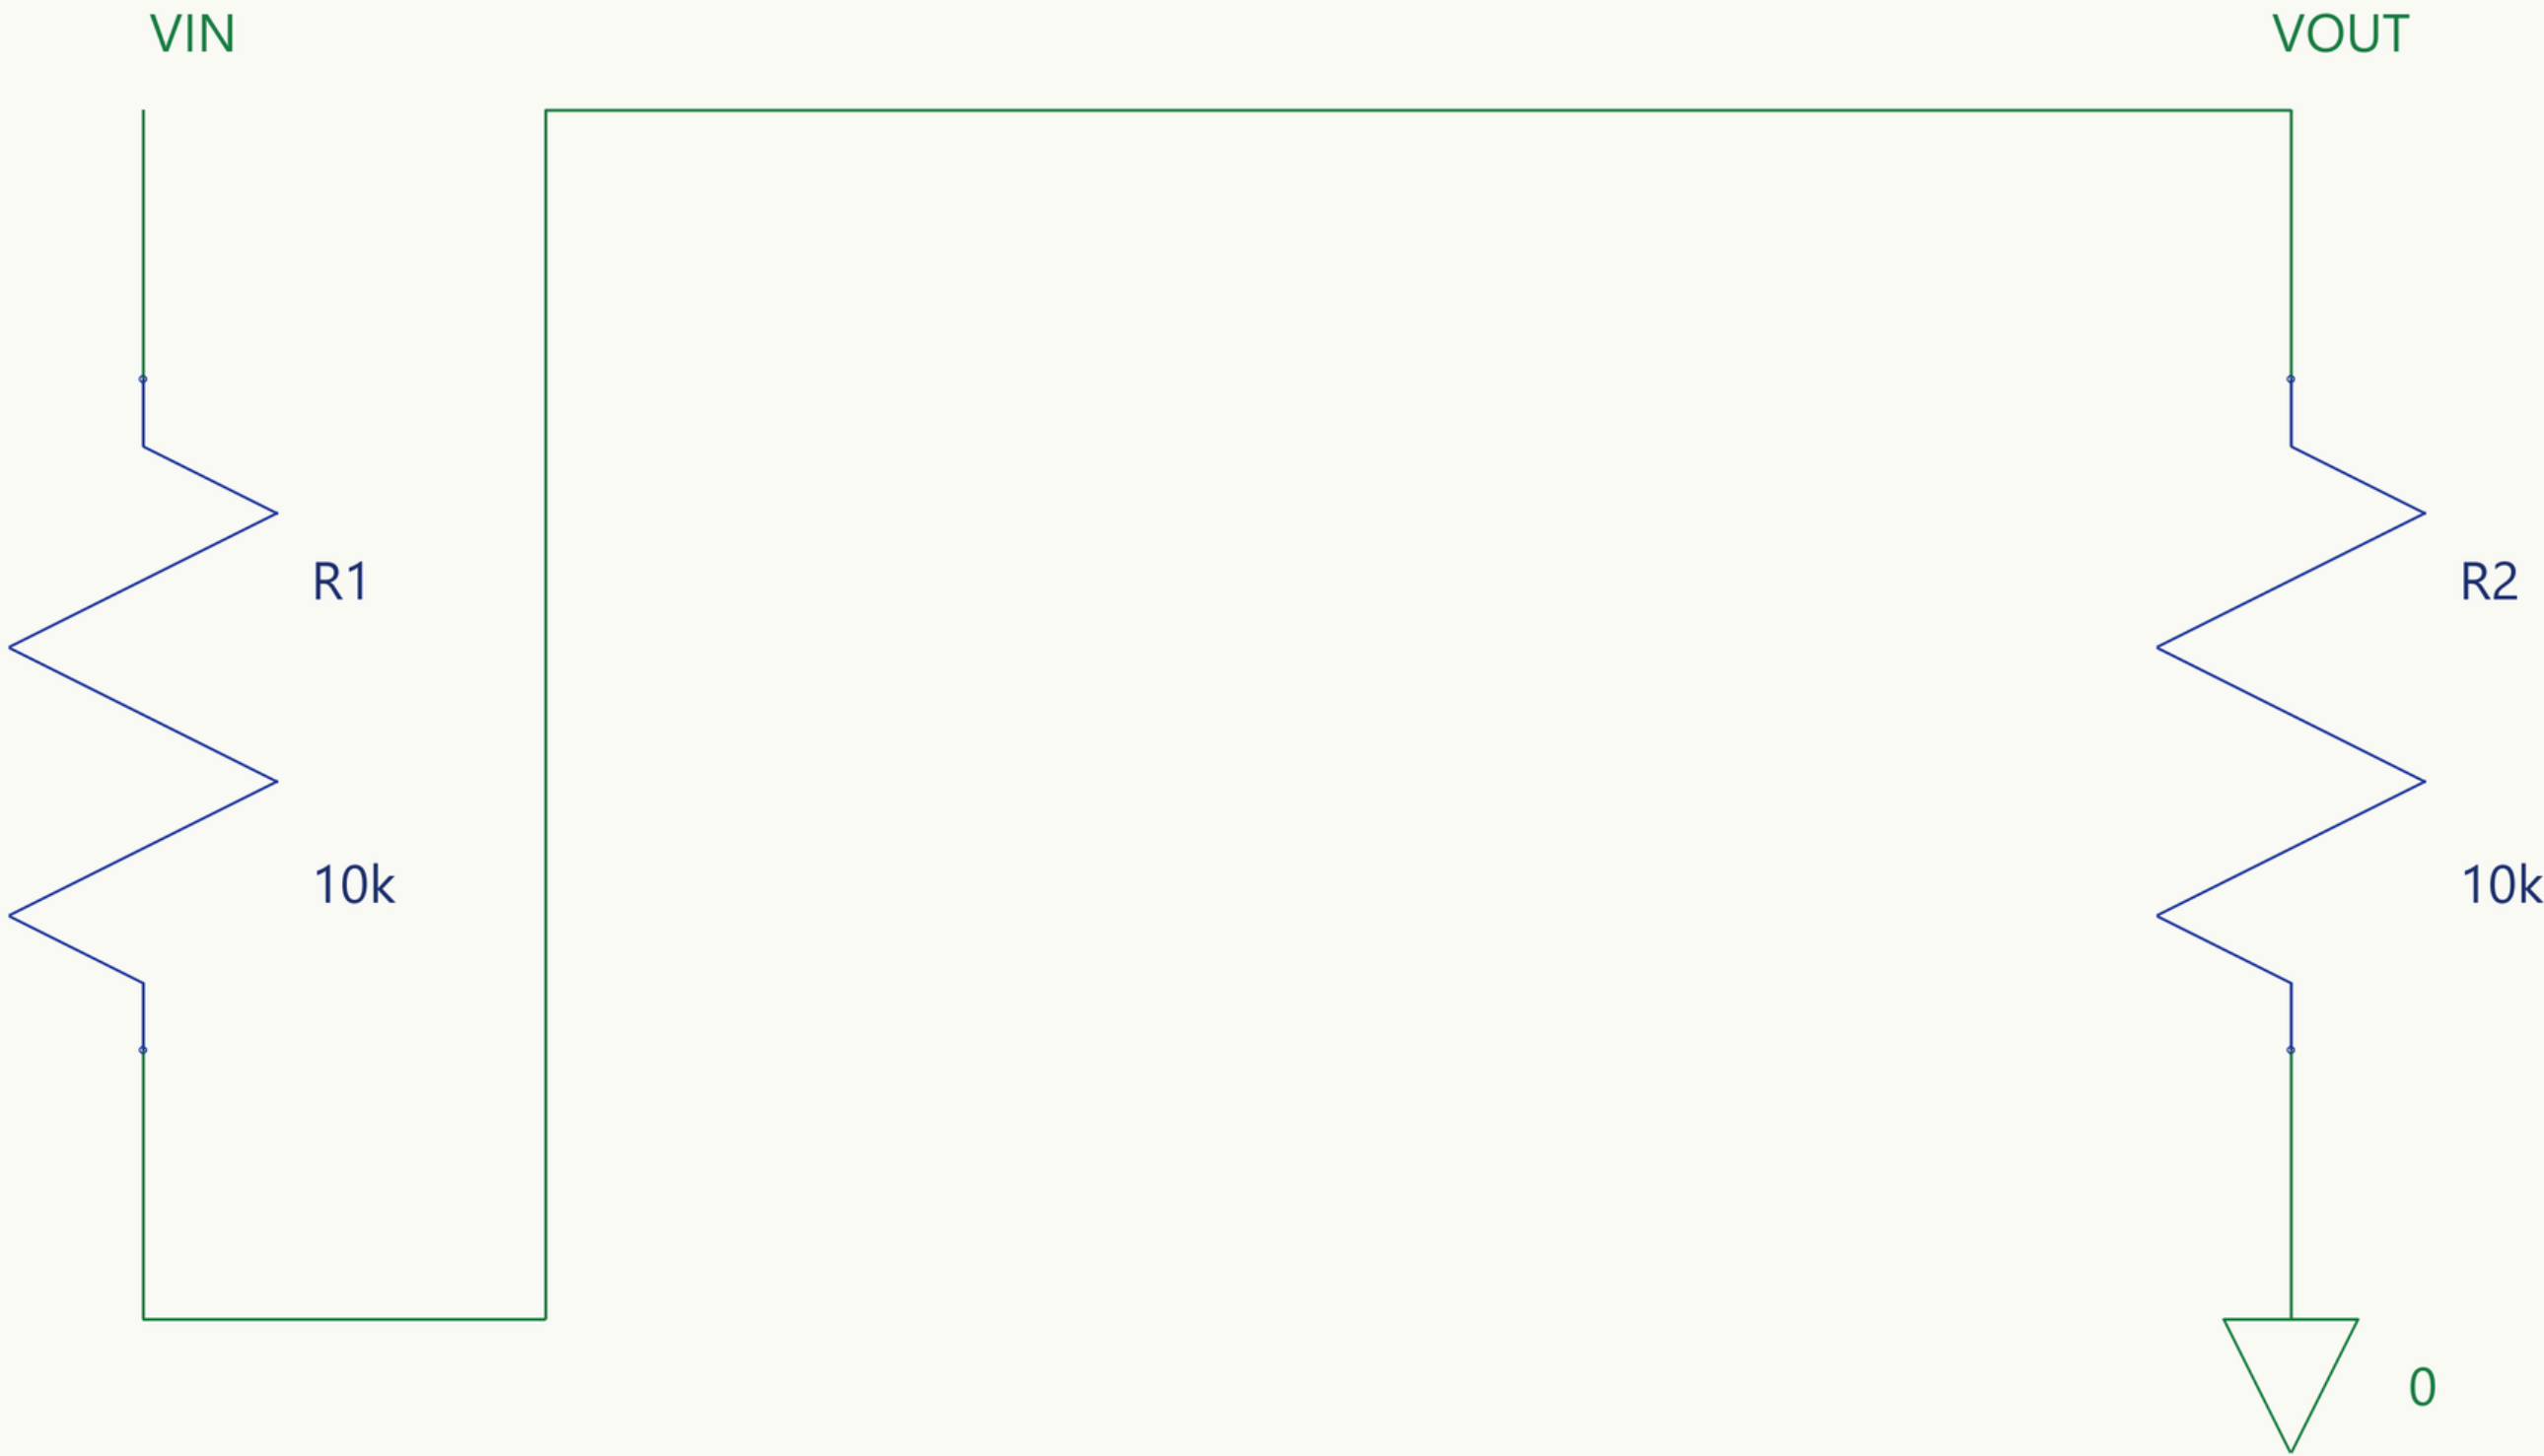

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

Voltage Divider

Inspection rendering of exported ASC with installed LTspice ASV geometry (not an application screenshot)

Phase 7 — Voltage Divider Routing Regression

voltage_divider.asc | 2 symbols / 7 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 4 pins | 3 groups | 7 wire segments | 0 nonconductive crossings

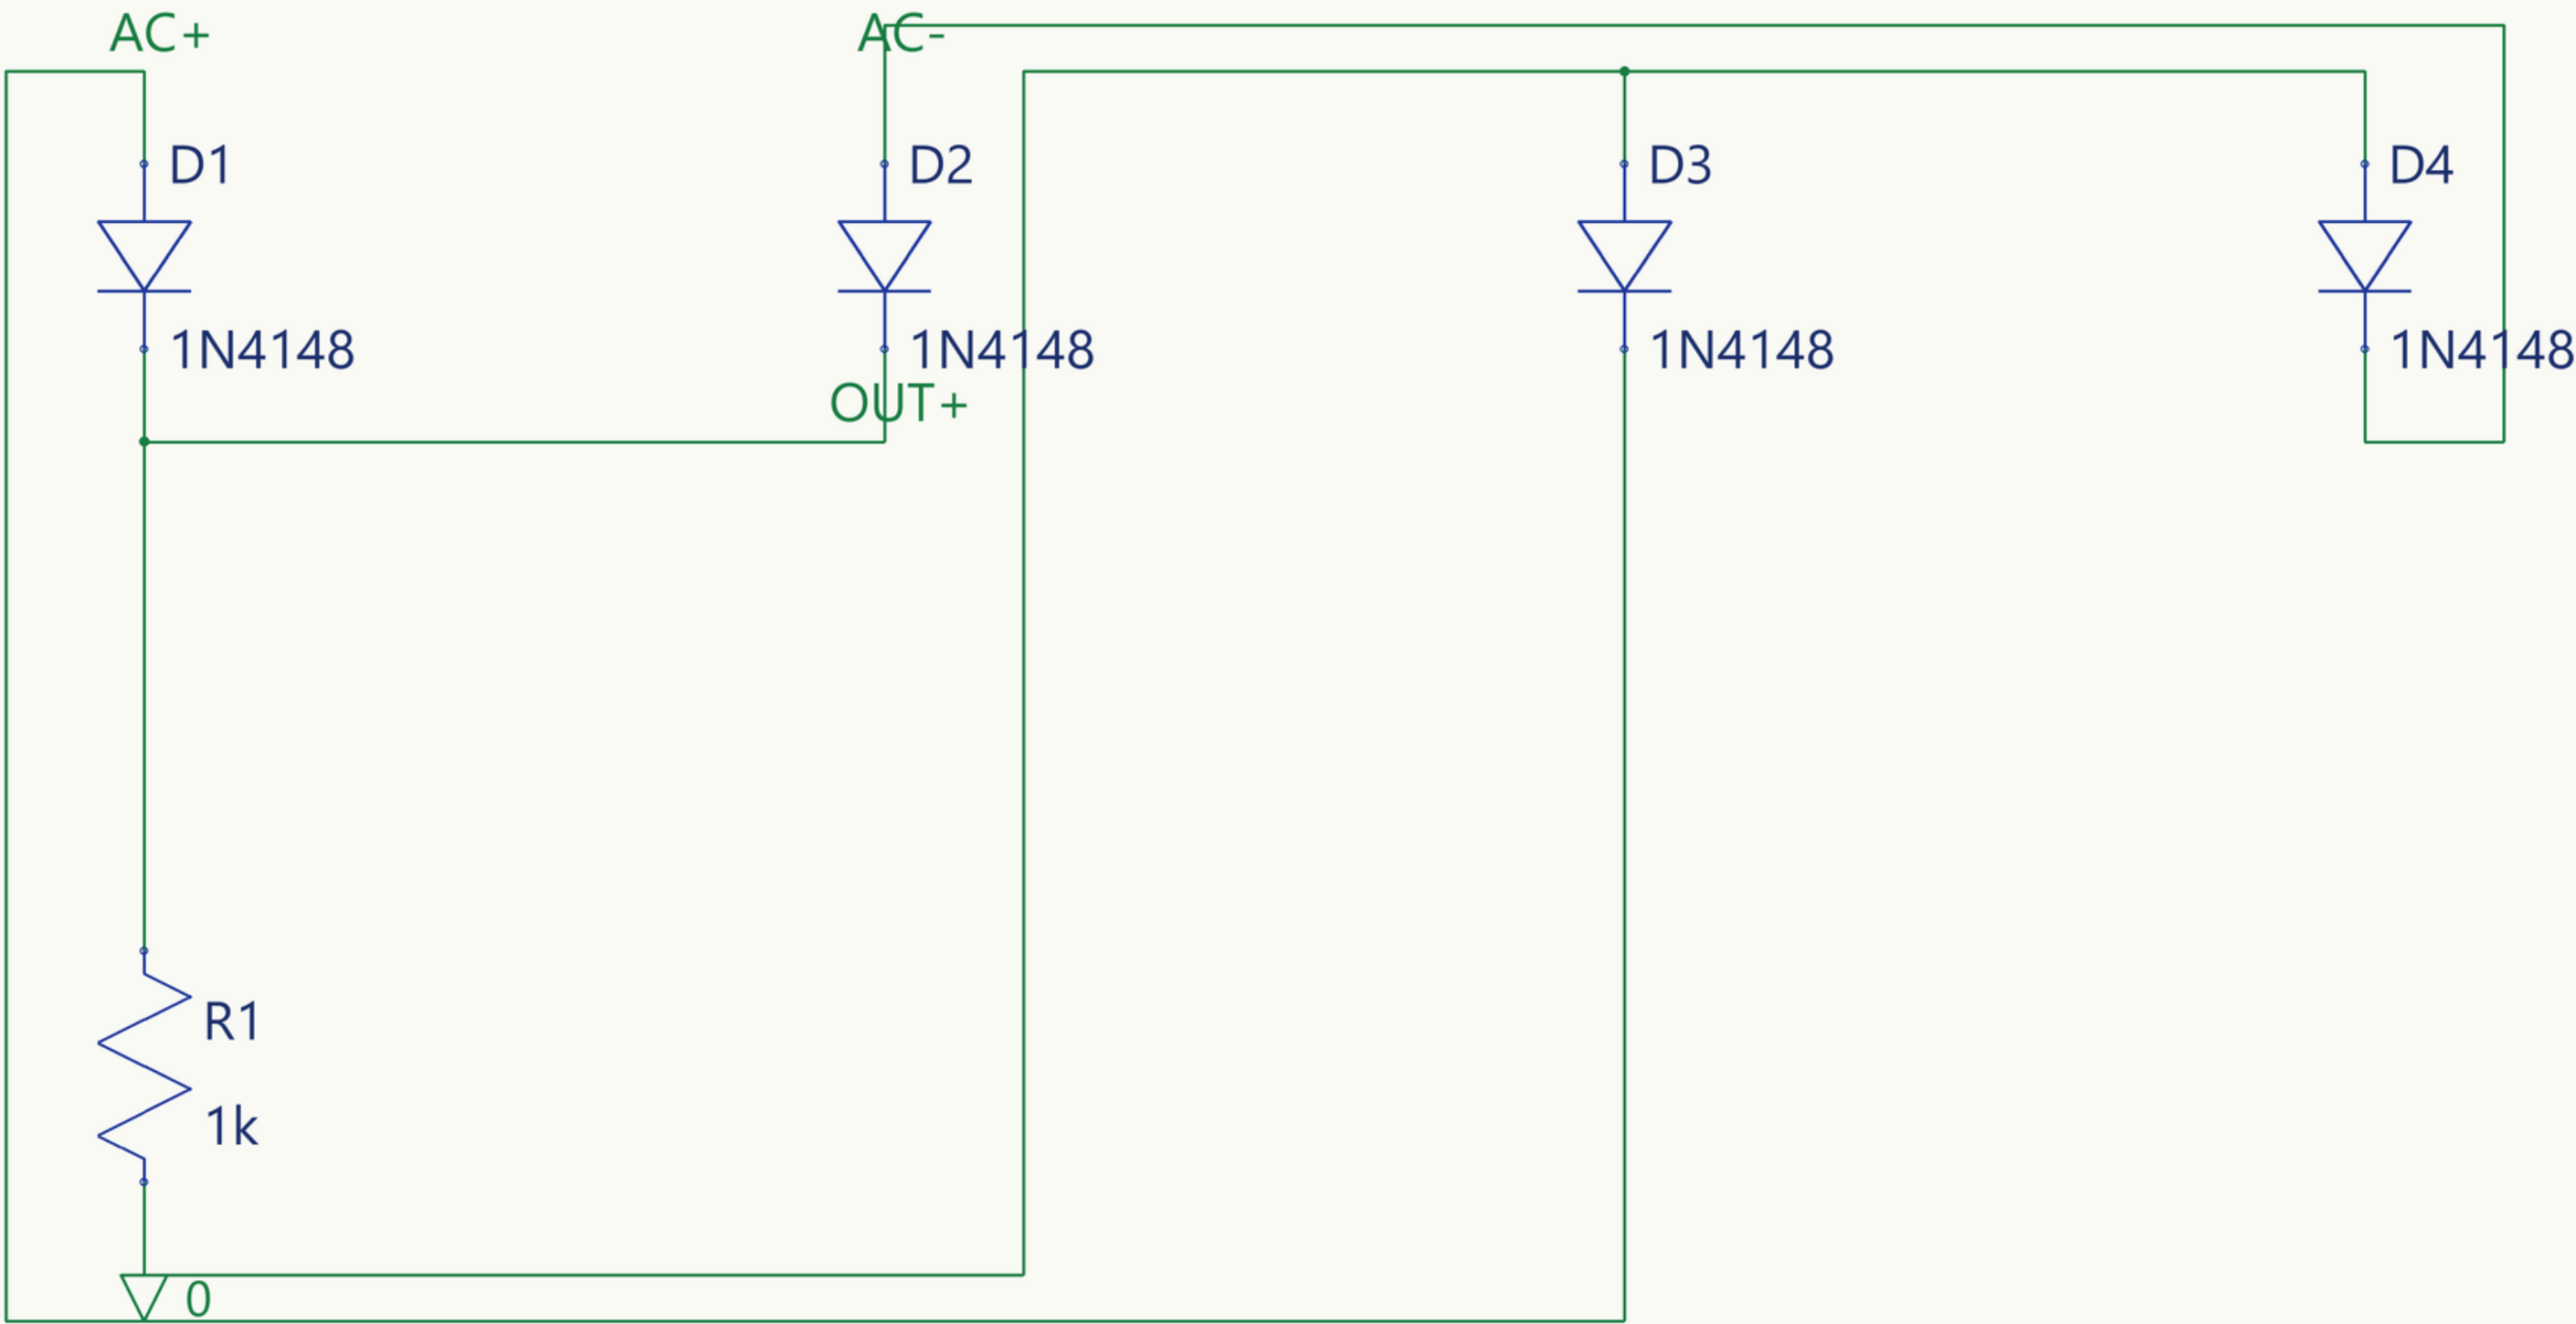

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

Bridge Rectifier

Inspection rendering of exported ASC with installed LTspice ASV geometry (not an application screenshot)

Phase 7 — Bridge Rectifier Routing Regression

bridge_rectifier.asc | 5 symbols / 24 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 10 pins | 4 groups | 24 wire segments | 0 nonconductive crossings

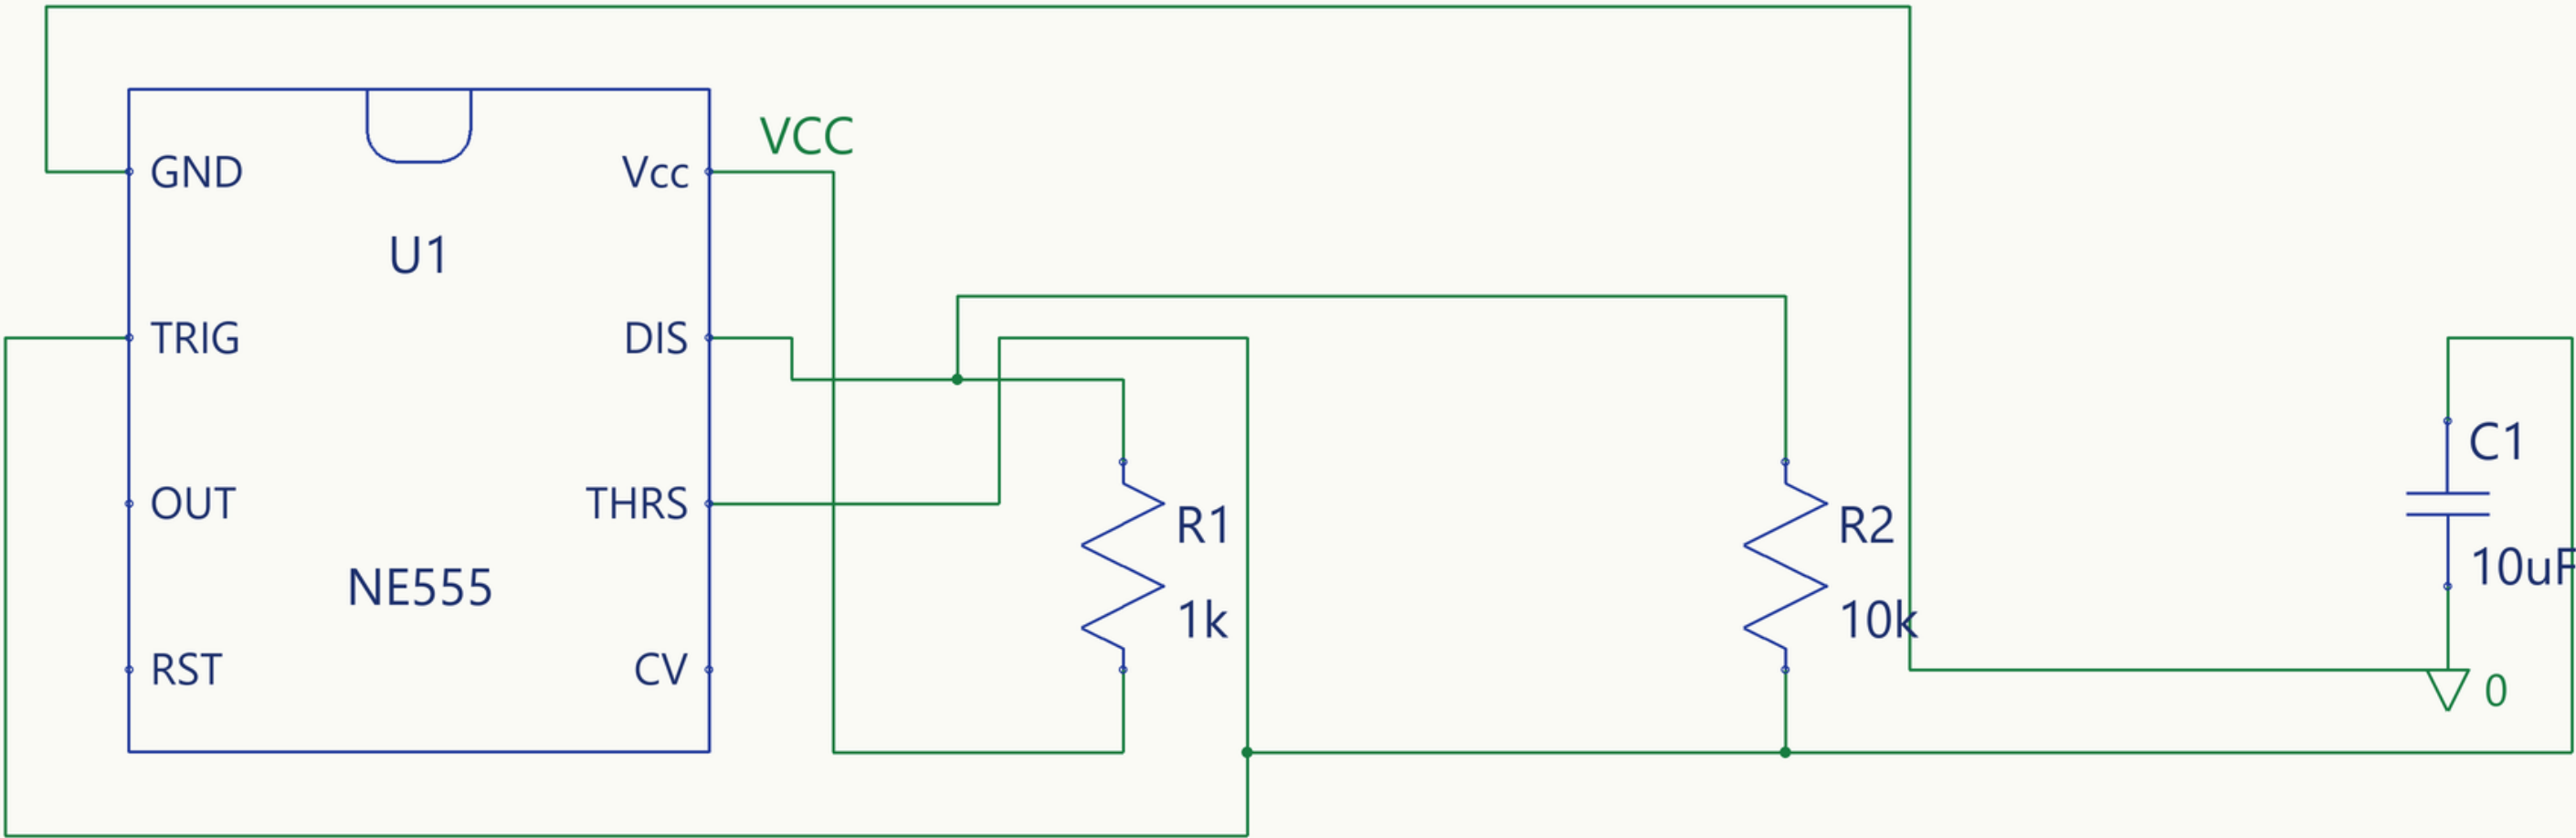

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

NE555 Astable Multivibrator

Inspection rendering of exported ASC with installed LTspice ASY geometry (not an application screenshot)

Phase 7 — 555 Astable Multivibrator

555_astable_multivibrator.asc | 4 symbols / 36 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 14 pins | 7 groups | 36 wire segments | 3 nonconductive crossings

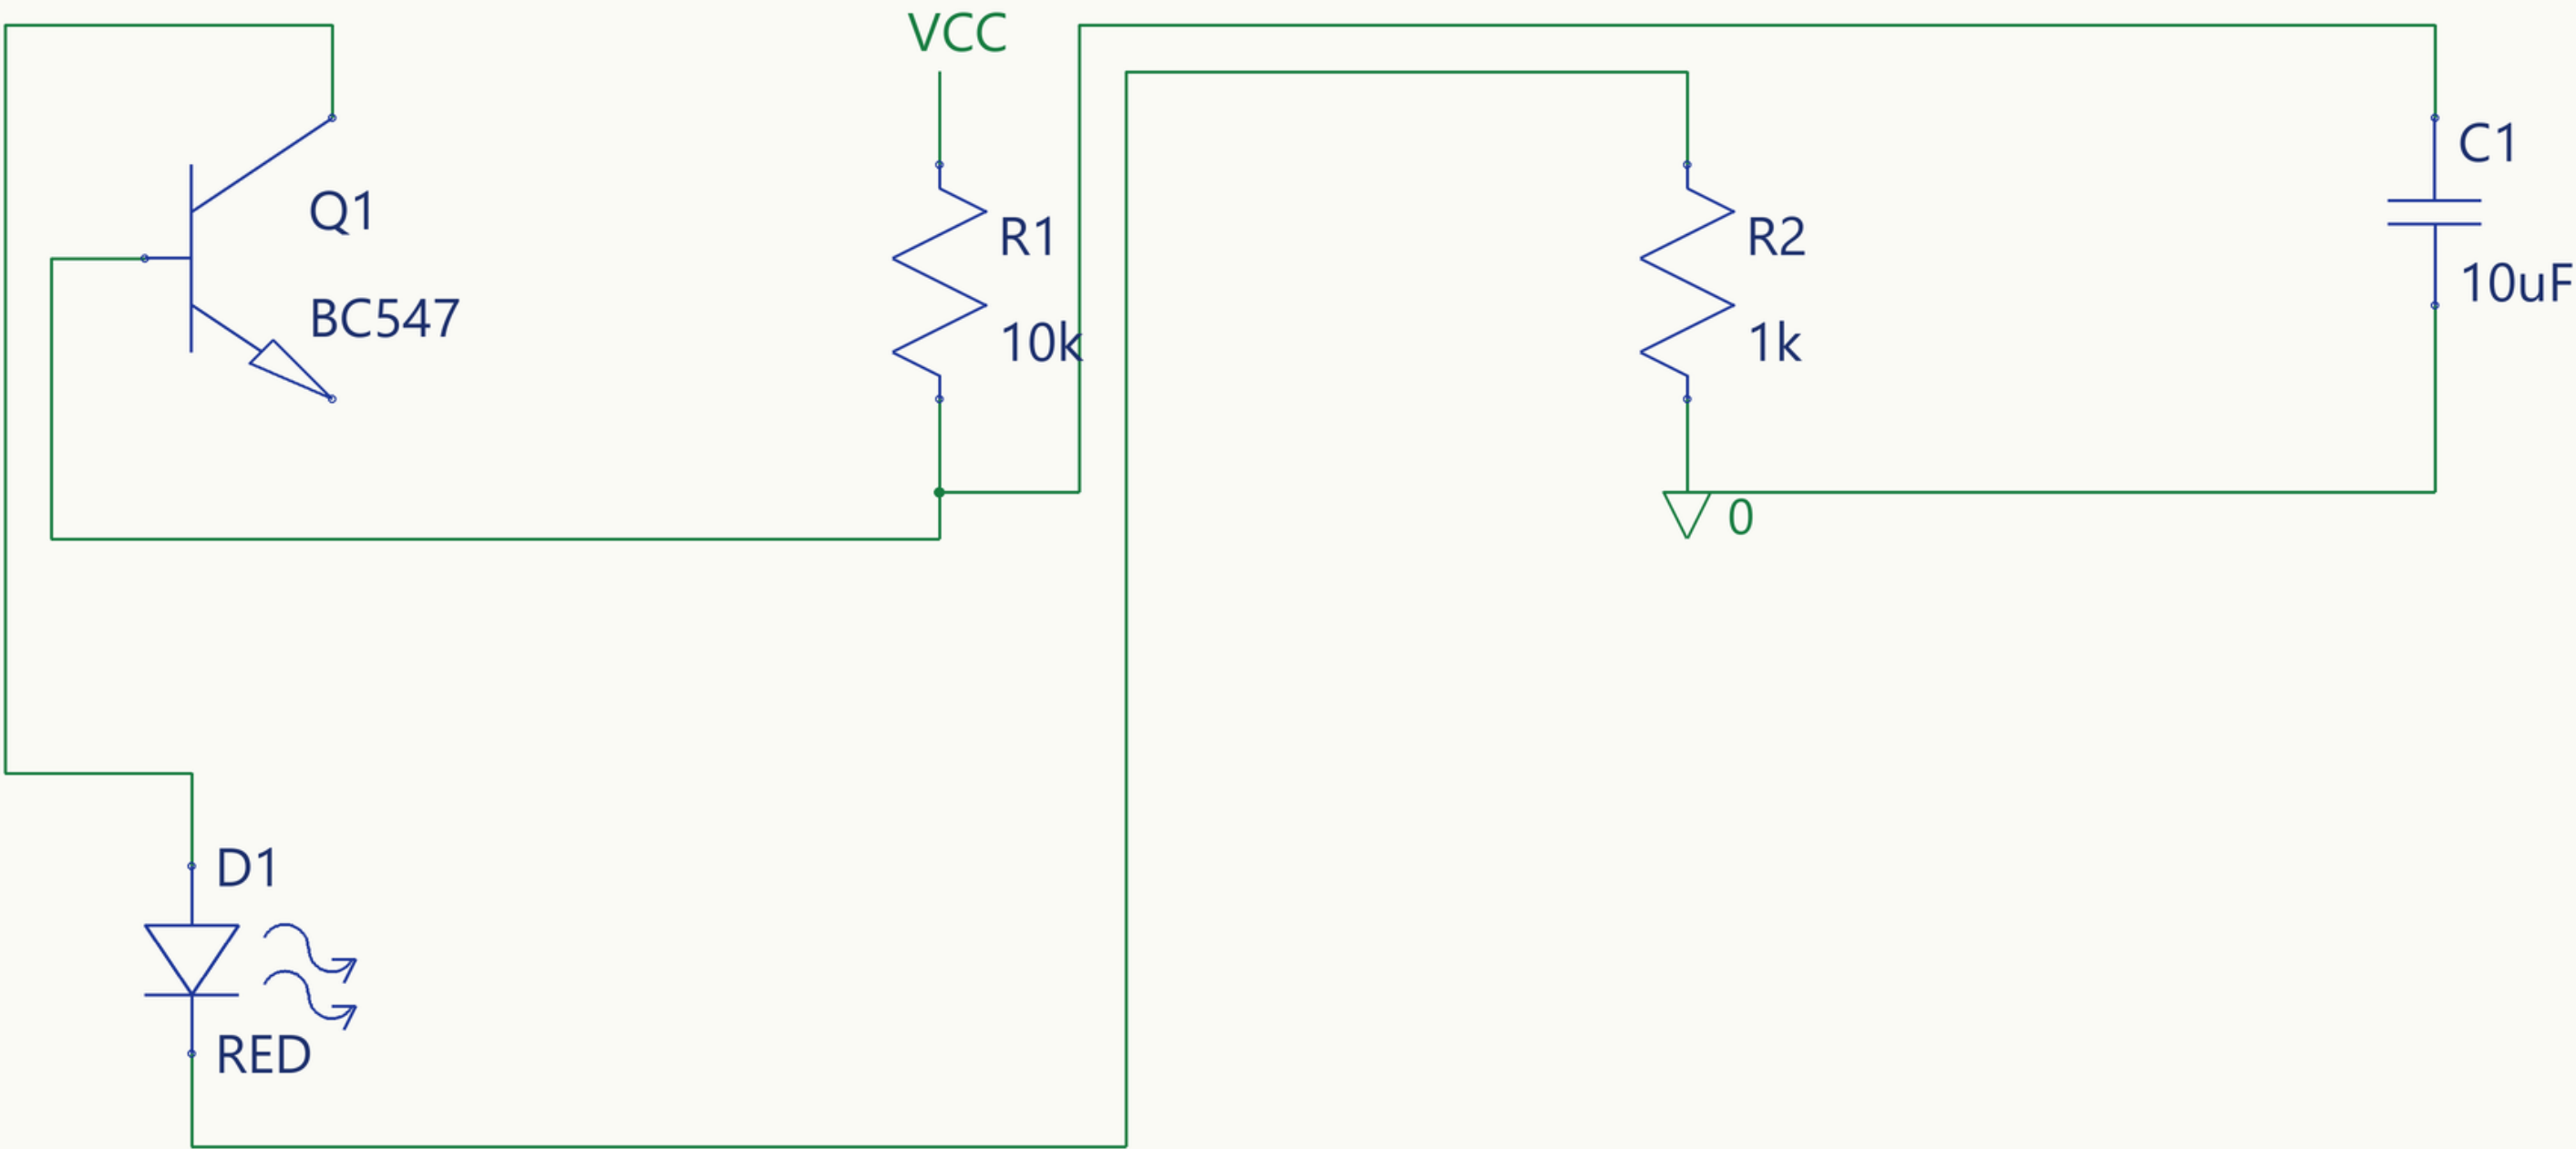

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.

LED Blinker

Inspection rendering of exported ASC with installed LTspice ASY geometry (not an application screenshot)

Phase 7 — LED Blinker

led_blinker.asc | 5 symbols / 24 wires | pins: hollow blue; junctions: solid green

Real LTspice electrical partition: PASS | 11 pins | 6 groups | 24 wire segments | 0 nonconductive crossings

Visual checks: exact pin ends; orthogonal wires; body clearance; bends and detours; junctions; labels and spacing.
Electrical connectivity is checked independently by netlisting; visual review must still assess presentation quality.
